Career objective To work in an innovative and competitive environment that will help me gain knowledge and contribute to the development and growth of the organization.

Education

B.tech in Information Technology - CGPA : 7.85

GCE Karad (2023 -2027)

Projects

1. AI-Based Diabetes Prediction System

Tech Stack: Python, Scikit-learn, Streamlit, Pandas

- Built a machine learning tool to predict diabetes risk using health parameters like glucose, BMI, insulin, and age.
- Trained and evaluated models (Logistic Regression, Random Forest, SVM) for high accuracy.
- Designed a Streamlit interface for real-time user input and instant prediction output.
- Applied data preprocessing and modularized code for scalability and clarity.

2. College Rules Chatbot

Tech Stack: Python, FastAPI, JSON, Uvicorn

- Designed RESTful APIs to serve college rules via structured JSON.
- Built NLP-based query matching to answer student questions.
- Developed endpoints for rule retrieval and dynamic query handling.
- Modular architecture ready for UI integration and rule expansion

Technical Skills

Languages : Python ,C, C++, Java, SQL

Data Science: Data Analysis, EDA, Visualization(Matplotlib, Seaborn), Statistical Analysis

ML Tools : NumPy , Pandas, Scikit-learn, TensorFlow, Keras , Streamlit

Technical : HTML , CSS

Experience

- IFS INDIA MERCANTILE PVT LIMITD – Python Intern June 24-July 24
 - Worked on automation scripts, debugging and optimized Logic
- Quick Heal foundation – Cyber Awareness July 25 – Nov 25
 - Conducted Cyber Security awareness session

Extracurricular

1. Hackathon's Participation – SIH , Avishkar
2. ITSA - Joint Secretary
3. Member of Cyber security Club
4. Avishkar Coordinator
